

MILLION DOLLAR TAN

Australian Importer

Most people put themselves at great risk to achieve a sun-kissed, bronzed look under the sun or a tanning bed. Unfortunately, the consequences of too many years of sunbathing and sunburns result in premature wrinkles, brown spots, and worst of all, skin cancer (the most commonly diagnosed cancer!) In fact, tanning beds emit more dangerous UVA rays in a shorter period of time than does the sun. Tanning beds can also damage your eye sight and immune system, and if not properly sanitized, can be a haven for bacteria.

Sunless tanning provides instant gratification, is by far the safest way to tan, and with Million Dollar Tanning's system, there's no reason to use any other approach. In this comprehensive instructional DVD, you'll learn how to airbrush natural looking, trauma-free tans for profit, the necessary accessories and equipment, spray gun and airbrush handling techniques, pricing guidelines, and much more.
